Reasons for Allowance

Claims 1, 3-7 and 9-12 are allowed. The following is an examiner's statement of

reasons for allowance: The invention of independent claim 1 is directed to a method for

the conversion of organic waste, wherein the waste is introduced into a cell in which a

pair of electrodes is present, which pair of electrodes comprises at least one anode and at

least one cathode, the anode and cathode being separated by a porous, electronically non-

conductive, non-ion selective partition wall, while an oxidizer is introduced to the

cathode and wherein a potential difference is formed across said pair of electrodes such

that at the anode CO_2 is formed and that electricity is produced, and the porous

electronically non-conductive, non-ion selective partition wall is partitioned to form at least one anaerobic compartment and at least one aerobic compartment, wherein the cell is a bipolar fuel cell having two or more pair of electrodes wherein each pair of electrodes is interconnected by an electronically conductive and non-ionic conductive wall, while the partition wall provides at least two types of channels, the open space of the first type of channel is in electrically conductive contact with the cathode and the open space of the second type of channel is in electronically conductive contact with the anode.

The closest prior arts of record, Kim et al. (*229), Kim et al. (*061), Chao et al. and Habermann et al. do not teach or suggest wherein biofuel cell is a bipolar fuel cell in which two or more pair of electrodes are present, each pair of electrodes having one anode and one cathode, wherein the anode and cathode of each pair of electrodes are interconnected by an electronically conductive and non-ionic conductive wall, while the porous, electronically non-conductive, non-ion-selective partition wall of a at least two types of compartments provides at least two types of channels, the open space of the first type of channel being in electrically conductive contact with the cathode and the open space of the second type of channel being in electronically conductive contact with the anode.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
